-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election of claims 1-3 in Paper No. 7 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sirhan et al (US Patent 5,496,275) in view of Sagae (US Patent 5,176,637).

Sirhan discloses a catheter construction. As shown in Fig. 1, the catheter comprises body 10 with an inner tubular member 11 and lumen 12, an outer tubular member 13 disposed about the inner tubular member and defining lumen 14.

Guidewire 21 is inserted into the inner lumen 12 of the inner tubular member 11. The tubular members are adhesively bonded together (see col. 7, lines 37-41). At col. 7, lines 48-50, Sirhan discloses that the inner and outer tubes may be made of suitable plastic materials such as polyethylene, polyimide or polyvinyl chloride.

Art Unit: 1734

However, Sirhan does not disclose the ultrasonic bonding claimed by the applicant. Regarding this difference, the applicant is directed to the reference of Sagae.

Sagae discloses a catheter in which fixing member 5 is welded to outer and inner tubes by ultrasonic waves or adhesives (see col. 3, lines 61-63). Therefore adhesives and ultrasonic waves are functionally equivalent alternate expedients in the art for joining tubular members of catheters. For this reason it would have been obvious to one having ordinary skill in the art to substitute ultrasonic waves for the adhesive disclosed by Sirhan.
